Designed for competitive online gaming (FPS, TPS, racing games, and extraction shooters), the REVOLUTION PRO X – SE allows players on PC, XBOX Series X|S, XBOX One, and Smart TVs to fine-tune their controls to suit their playstyle. Its control ring lets you adjust the mechanical tension of the joysticks with a single gesture to prioritize either fast movements or precise aiming, depending on the situation.

The REVOLUTION PRO X – SE features a minimalist design inspired by *Hell is Us* art style. It incorporates Hall Effect joysticks, buttons and instant triggers equipped with micro-switch, as well as two programmable shortcut buttons on the back. On PC, it can be used in wired mode with a 1,000 Hz polling rate, corresponding to a claimed latency of 1 ms, to prioritize responsiveness.

“With the REVOLUTION PRO X – SE, we wanted to offer a full-featured precision controller at a competitive price,” says Yannick Allaert, Director of the Accessories Division at NACON. “Its joystick tension adjustment, Hall Effect sensors, and micro-switch combine technologies designed to allow every player to tailor their controls to their playing style.”

The REVOLUTION PRO X – SE is available now across Europe and on the official nacongaming.com website at a RRP of €129.99 / £109.99.
